Administrative Advisory Committee
Meeting Minutes
February 2, 2017

• All-Campus discussion on shared governance

  ○ AAC definition of shared governance:
    ▪ A highly organized system of making decisions that affect multiple stakeholders. The decisions are made with intent to support the vision and goals of the overall group. After decisions are made there is evaluation of the outcomes with the chance to make amendments made moving forward.

  ○ How shared governance at Allegheny College impacts AAC:
    ▪ AAC would like to have the goals and visions for the group be identified. What is the end point and what could this group do to better serve the institution? The groups may have different missions, but do we have a single structured vision?
    ▪ We would like to have more unity with the other committees to provide more effective directive.

• Action points:

  ○ Sam-identify AAC organizational chart and see which 2 clusters will be open after Beth and Kristin’s terms are up. After, reach out to HR to see which employees fall under those clusters.
