

Water, Water, Everywhere but Only a Drop to Drink!

A professional development workshop sponsored by
CREEK CONNECTIONS for regional secondary school teachers on:
**Groundwater,
Drinking Water,
& Water Pollution**

Friday, February 27, 2004

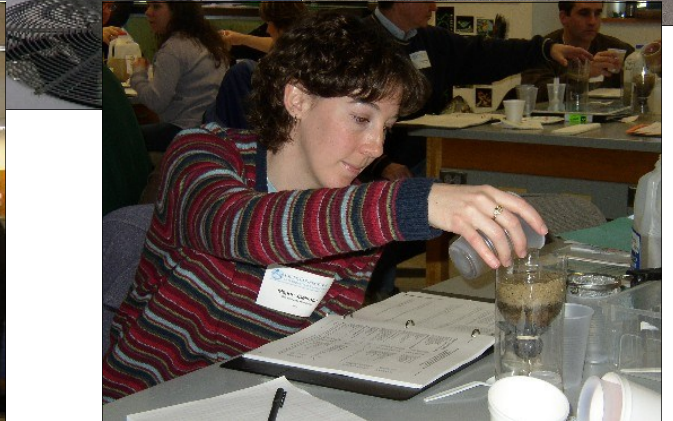

Teachers participated in a number of hands-on activities. Teachers worked in small groups to understand the basics of groundwater simulation, water filtration, and the amount of potable water on Earth. In addition, there were also educational presentations given throughout the day.

Teachers from many different areas of study were able to meet, greet, and share ideas for their classrooms.

In the afternoon, the group went on a field trip to Meadville's Wastewater Treatment Facility.
