

Having trouble logging into Sakai?

Sometimes Allegheny's authentication system has trouble connecting with Sakai. Resetting your Allegheny password usually remedies this.

To reset your Allegheny password:

Go to: https://accounts.allegheny.edu/pw_change_page.php

The screenshot shows the 'Changing your Allegheny Account Password' page. It includes a list of password requirements, a form with fields for User Name, Password, New Password, and Retype New Password, and a 'Change Password' button. Callouts provide instructions: 'Be sure your new password follows these guidelines' points to the requirements list; 'Enter your user name, old password, and your new password. To verify it is correct, retype your new password.' points to the form fields; and 'Select "Change Password" when done.' points to the button. A note states 'Your password change will take 10 minutes to process'.

Be sure your new password follows these guidelines.

1. Your password must be between 8 and 20 characters long.
2. You must include at least one of each of the following:
 - Uppercase letter
 - Lowercase letter
 - Number
 - Non-alphanumeric character (! , @ , # , etc)

User Name: (use lower case and do not include @allegheny.edu)

Password:

New Password:

Retype New Password:

Your password change will take 10 minutes to process

Select "Change Password" when done.

Make sure your new password is something you will remember!

Wait 10 minutes for your password to reset before reattempting to log into Sakai.
